

## **Our Vision**

We would like to announce that “IEEJ Vision” has just been established and we have started work to implement it from this April. The “IEEJ Vision,” subheading “Considering the Energy Issues of Japan and Asia from a Global Perspective,” defines “5 focusing research areas ” together with 3 main points, “active fields, expertise that we should develop and organizational operation.” We aspire to become the “No 1 Think Tank” and the leading voice in Japanese and Asian energy-related issues and global environmental subjects. We greatly look forward to your continued support of our institution.
