Press Release

February 2, 2018 The Institute of Energy Economic, Japan

The Institute of Energy Economics, Japan – Ranked 2nd think tank in the world in the category of Energy and Resource Policy

On the 31st January 2018, the Think Tanks and Civil Societies Program at the University of Pennsylvania released its 2017 Global Go To Think Tank Index Report, the most comprehensive ranking of the world's top think tanks.

In the ranking for 2017, the Institute of Energy Economics, Japan (IEEJ) is ranked 2nd in the world in the category of Energy and Resource Policy Think Tanks. https://repository.upenn.edu/cgi/viewcontent.cgi?article=1012&context=think_tanks (Please find the attached material and page 105 of the report above.)

We are ranked up from the 3rd in the ranking for 2016 and we are once again recognized as among the Top Energy and Resource Policy Think Tanks in the world. We were the 3rd in the ranking for 2014, 1st in the ranking for 2015.

Of course, this recognition owes to the unrelenting support of energy experts and readers as well as the efforts of former and current staff of the institute.

IEEJ will continue to dispatch highly appreciated information and material, including policy and company strategy recommendations, both domestically and internationally. IEEJ will carry on with its research and analyses on vast areas of themes such as, energy, global warming, and geopolitics of the Middle East, including econometric and macroeconomic analysis

We appreciate your continuing support.
