The 15th IEEJ Webinar for the World

On November 15th, we are honored to host the 15th IEEJ Webinar for the World. "IEEJ Webinar for the World" is a webinar which is intended to, exclusively in English, offer not only our members but also stakeholders of think-tanks, international organizations, and other institutions from overseas with IEEJ's latest research and analyses on global energy agendas such as carbon neutrality and other conundrums surrounding us.

In the 15th IEEJ Webinar for the World, IEEJ will present a quick look of "IEEJ Outlook 2025", IEEJ's newest global energy outlook for 2050, which IEEJ released on October 17th. The "IEEJ Outlook 2025", which is a "forecast based outlook", presents very different energy perspectives for the future than those presented by "back-cast based outlooks". In case that you participated in the 448th Forum on Research Works on October 18th, please bear in mind that the content itself will be almost the same as the forum above. We are very much looking forward to your participation.
