

The 19th IEEJ Webinar for the World

We are pleased to host the 19th IEEJ Webinar for the World. "IEEJ Webinar for the World" is a webinar which is intended to, exclusively in English, offer not only our members but also stakeholders of think-tanks, international organizations, and other institutions from overseas with IEEJ's latest research and analyses on global energy agendas such as carbon neutrality and other conundrums surrounding us.

In the upcoming webinar, we will present a quick look of "**IEEJ Outlook 2026: Global Energy Outlook for 2050**", IEEJ's newest global energy outlook for 2050, which IEEJ released on October 16th. The "IEEJ Outlook 2026", which is a "**forecast based projection**", presents very different energy perspectives for the future than those presented by "back-cast based projections". If you are planning to attend the 451st Forum on Research Works on October 17th, please bear in mind that the content itself will be almost the same as the forum above. We are very much looking forward to your participation.
