

## The 6<sup>th</sup> IEEJ Webinar for the World

On July 5, we, the IEEJ, are honored to host the 6th IEEJ Webinar for the World. “IEEJ Webinar for the World” is a webinar which is intended to, exclusively in English, offer not only our members but also our stakeholders such as policy makers, business leaders, and other distinguished professionals across the world with IEEJ’s existing research and analyses on global energy agendas. The first and foremost objective of this webinar is to discuss with participants from all over the world a set of global energy challenges especially faced with Japan and Asian countries.

In the upcoming webinar, based on the Schloos Elmau G7 Summit Communique to be issued on June 28 and the G7 Climate, Energy and Environment Ministers’ Communique already issued on May 27, we, IEEJ, will discuss implications of these G7 agreements on climate and energy policies for both Japan and Asian countries. The next year’s G7 Summit will take place in Hiroshima, Japan. It is therefore a very good opportunity to discuss how Asian region should make most of this year’s summit in order to secure its sustainable development in a realistic manner. It is our privilege that Prof. Jun Arima, Graduate School of Public Policies, the University of Tokyo, will join us as a distinguished commentator in this webinar.

We are very much looking forward to welcoming you to the upcoming event.
