

The 7th IEEJ Webinar for the World

On October 6, we, IEEJ, are honored to host the 7th IEEJ Webinar for the World. “IEEJ Webinar for the World” is a webinar which is intended to, exclusively in English, offer not only our members but also our stakeholders such as policy makers, business leaders, and other distinguished professionals across the world with IEEJ’s existing research and analyses on global energy agendas. The first and foremost objective of this webinar is to discuss with participants from all over the world a set of global energy challenges especially faced with Japan and Asian countries.

In the upcoming webinar, we will feature “LNG market and its outlook” and “Challenges for boosting renewables under soaring energy prices”, each of which is an English version of the two papers selected out of the five papers from our 441st Forum on Research Works of this July. So, in case that you should have participated in the forum above, please bear in mind that the content itself does not differ from what you learnt later this July.

We are very much looking forward to welcoming you to the upcoming event.
