

**Mr Antonio Vayá Soler**

**Nuclear Energy Analyst, OECD Nuclear Energy Agency**

Antonio Vayá Soler is a Nuclear Energy Analyst at the OECD/NEA. Since 2018, he works on techno-economic studies related to the long-term operation of nuclear power plants, Gen-III costs reduction opportunities and SMRs. He is also involved in the Gen IV International Forum initiative where he supports the Senior Industrial Advisory Panel as well as MSR development activities. Before joining the OECD/NEA, he was project lead engineer at Framatome in charge of safety studies for the French fleet. He holds a Master's degree in nuclear engineering from Supélec and an MBA from Université de la Sorbonne.
