

## The 18<sup>th</sup> IEEJ Global Energy Webinar

This time, by being honored to host, Mr. Ben Cahill, Senior Fellow, Energy Security and Climate Change Program, Center for Strategic and International Studies (CSIS), we will offer our regular webinar focusing exclusively on the theme “Reducing Methane Emissions from Global Gas”.

Cutting methane emissions from oil and gas will help slow the pace of global warming, and methane is firmly on the international climate agenda. This webinar will outline recent global, national, and sub-national efforts to curtail methane emissions from oil and gas. It will analyze how demand for cleaner, or “differentiated,” gas might develop, delving into the drivers for buyers and others in the gas ecosystem. The findings of the upcoming event are based on interviews with global gas players in Asia, Europe, and the United States.

In this session, the highly prominent expert, you can expect for informative insights about reduction in methane emission. QA session is to follow the presentations. We are much looking forward to seeing you again in the 18<sup>th</sup> IEEJ Energy Webinar.

1. Date/Time: May 25<sup>th</sup>, 2022, 10:00~10:50AM JST

2. Webinar Application: Zoom

3. Schedule:

<10:00~10:05AM JST Introduction>

<10:05~10:25AM JST Presentation>

“Reducing Methane Emissions from Global Gas”

Mr. Ben Cahill

Senior Fellow, Energy Security and Climate Change Program  
Center for Strategic and International Studies (CSIS)

<10:25~10:50AMJST Q&A Session>

<10:50AM JST End>

4. Language: English/Japanese (Spontaneous Interpretation)
